

Institute of Computer Science Vikram University, Ujjain

Activity Schedule for IT-Cell / Website development

IT Cell / Web site development

IT-Cell / Web site development at Institute of Computer Science, Vikram University, Ujjain(M.P.) has started with the objective for developing web site of the institute. The purpose of developing website for this institute is to provide all the necessary information to users of this web site. Users may be students of this institute, teachers, alumni, admission seekers and others.

This web site will have two phase-

Phase 1: Static Web site

Phase 2: Dynamic Web site

Phase 1: Static Web site: Initially we develop static web site. In this phase we focus on designing static web pages like home page, about us, mission, vision, contact us, download page, gallery, course details, alumni, placements, teachers details and others.

To design all pages we need basic details for relevant pages. To achieve this goal we need authenticate information from institute's supporting staffs. Information would be Director's statements, images of the institutes, events, different cultural activities, Courses details, list of alumni with designation and place, list of placements and others.

To achieve this goal we need at least two months. After then we have to purchase domain name of web site like <http://www.icsvvu.org> and hosting space.

Phase 2: Dynamic Web site: This will be next phase of web site development. In this phase we design interactive web pages. In this phase we focus on designing

web page like tracking online admission enquiries, online assignments submission by students, uploading and showing text / video lectures by teachers and others.

To achieve this goal we need at least three months.

Maximum time taken by finishing and hosting website activity will be 5 months from starting date.

Future planning: Atomization of Exam Result Processing of the Institute's courses. Initially on trial basis we work on any course like B.C.A. First Year.

Platform for website development:

HTML, CSS, JavaScript, ASP.NET / PHP, MySql / SQL Server.

Responsibilities under taken IT-Cell:

1. Website developments
2. Purchase and renewal of website domain name and hosting spaces.
